

# K A N S A S

RODERICK L. BREMBY, SECRETARY

DEPARTMENT OF HEALTH AND ENVIRONMENT

KATHLEEN SEBELIUS, GOVERNOR

April 8, 2003

Prospective Bidders,

The following briefly summarizes major changes in the Limited Site Assessment (LSA) Request for Proposal (RFP) Version 8, June 2002. There are additional minor changes throughout the LSA/RFP. Please review the new LSA/RFP in its entirety. The current LSA RFP is Revision 9, March 2003.

## **Section 1.0 Proposal Process Information**

- 1.3.2 Term "Licensed Professional" included.
- 1.3.4 Definition of "Licensed Professional."

## **Section 3.0 Statement of Work**

- 3.3.4.4 Soil samples will be collected until groundwater is encountered or drilling is discontinued at the direction of the KDHE Project Manager.
- 3.3.4.5 Last sentence added. Samples will be preserved as required by the analytical method.
- 3.3.4.6 Term "Licensed Professional" included.
- 3.3.5.3 Changes to monitoring well completion guidelines.
- 3.3.8.5 Last paragraph on Page 16 concerning trip blank requirements. Trip blank analyses will be included on future LSA bid sheets.
- 3.4.2.6 Changed to include MtBE and EDB analyses for each groundwater sample and that TPH analysis may be requested.
- 3.4.5.1 Changes in the work notification requirements.

## **Section 4.0 Deliverables**

- 4.5.2 Term "Licensed Professional" included.
- 4.5.6 Table 2.1 - Added below list of inclusions
  - Samples collected for saturated and unsaturated zones tests, properties and data
  - Section 3.0 Maps - Scale for figures 2 - 6 changed to 3 - 6.
  - Figure 1 - Includes that the one mile radius should be clearly marked.
  - Figure 2 - Includes detailed information on the scales to be used for and the information to be included on the maps

Figure 7 - Changes to the map scale.

Figure 8 - Changes to the map scale.

Section 4.0 Drilling Logs - New item # 11 to be included on boring logs.

5.5.1 - Changes to include identification of current storage tank components and the location of any former tank basins and/or system components.

Appendix 7 - New items #5 and #7.

Appendix 11 - Specifies KRBCA software version 4.0 or later to be used.

Appendix 12 - Specifies electronic data to be submitted after final report approval.

4.6 - Please review the entire section. Changes made to correspond to the current Monitoring RFP.

## **Section 6.0 Proposal and Work Specific Definitions**

6.1.8 - Changes over the requirements for probe surveys

6.1.14 - Specifies costs to include installation of permanent monitoring wells with the pre approved temporary monitoring wells being an exception.

6.1.21 - Changes to incorporate updates to ASTM standards.

6.1.28 - Changes to incorporate updates to ASTM standards.

6.1.29 - Changes to what is included as waste water.

6.2.1 - Changes to the depth initial soil borings should be drilled to distinguish areas where groundwater is encountered and areas where groundwater is not expected to be encountered.

6.2.2 - Includes that a minimum of four monitoring wells will be installed unless otherwise directed by the KDHE Project Manager. Deletion of previous method to determine number of monitoring wells to be installed.

## **Attachments**

Attachment E, Field Workplan Worksheet - Added #3 under Part III, Site Maps and Photos

Attachment K, Risk Assessment Worksheet - Corrected ASTM Standards on page one and map scales and CAD requirements on page 3.

Respectfully,

Roger Boeken  
Environmental Geologist  
Bureau of Environmental Remediation
